

ECLIPSE

LED WORK LIGHT

Description:

- The new generation Eclipse LED work light. Square and super compact design equipped with 4pcs of 10 watt CREE LED's which produces 3600 lumens.
- The durable Die-cast aluminum housing is rugged and heavy duty to withstand the harshest conditions.
- Unique and special heat sink design for superior heat dissipation to prolong the life of the LED's to its full 50 000 hours potential.
- IP68 rate guaranteed, signifying that it is dust proof, water proof and shock resistant.
- Flexible stainless steel bracket offers 360° Rotation & 180° Tilt.
- 93% optical efficient PMMA lens, shatterproof and allows more light to go through.
- Deutsch Connector wiring for all-weather application.
- Applications ranging from ATV, 4X4 offroad, truck, construction, tractor, agricultural, road construction machinery, mining, drilling, agriculture, vessel, and forestry equipment.

Specifications:

Input: 9-50V
LED: 4pcs of 10 Watt CREE LED, 6000K
Power consumption: 40 WATT
Light output: 3600 lumens
Lens: Virtually unbreakable PC lens,
 light transmittance >93%, heat resistance +110° C
Housing: Rugged die-cast Aluminum Housing
Bracket: Stainless steel
Connection: Deutsch socket connector
Vibration: 12G rms
Lifespan: 50 000 operating hours
IP Rate: IP68

Operating temperature: -40°C to +105°C
Thermal: Protected
Reverse Voltage: Protected
